FERRUM COMPETENCE CENTER PROFESSIONAL CENTRIFUGE TRAINING

TRAINING BUILT AROUND YOUR GOALS TAILORED TO YOUR PEOPLE AND PROCESSES

Every operation is different – and so are its training requirements. That is why our training programs are designed as flexible modules, each focusing on a specific topic, application or skill set.

You define your objectives, and we create a customized training program that matches your operational needs, experience level and production environment.

Tailored training is particularly valuable for refresher courses, advanced qualification programs or when introducing a new Ferrum centrifuge within an organization already operating another Ferrum machine type.

A range of specialised training modules is available, allowing participants to build the exact expertise required for their role and responsibilities.

WHY ATTEND?

- ✓ Reduce downtime
- ✓ Improve operational safety
- ✓ Increase centrifuge performance
- ✓ Build in-house expertise
- ✓ Reduce service dependency

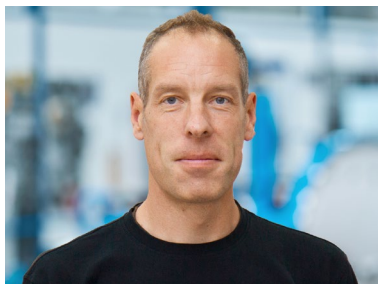

TRAINERS

Michael Siegrist
Head of Global Field Service
& Competence Center

18 years of hands-on experience,
Senior Expert for pusher centrifuges

” Participants benefit directly from our practical knowledge gained in the field and transferred straight into the training environment. Everything they learn can be applied immediately in their daily work.

Christian Henke
Service Engineer & Deputy Head
of Competence-Center

25 years of experience, Senior Service
Specialist and Safety Officer

” Sharing our knowledge and experience with our customers is part of Ferrum's identity.

BASIC TRAINING

Build a strong operational foundation

Reduce operator errors, improve process stability and increase equipment availability; covering all major assemblies, machine operation, routine maintenance and process fundamentals.

Participants gain the knowledge required to operate the centrifuge safely, efficiently and with confidence.

DURATION

2 days

TARGET AUDIENCE

Production and Line Managers
Operators
Project Managers
Product Managers
Process Engineers

EXPERT TRAINING

Take performance to the next level

Advanced maintenance training covering process optimization, washing efficiency, screen slot measurement, solids discharge and basket assembly, including practical sessions in the Ferrum laboratory. Innovation and automation topics are also included.

Designed for participants seeking deeper application expertise, process optimization skills and advanced maintenance knowledge.

DURATION

3–5 days

TARGET AUDIENCE

Production Managers and Operators
Quality Managers
Service Technicians
Maintenance and Service Teams

TROUBLESHOOTING

Reduce downtime and enable faster fault resolution in daily operations

Hands-on troubleshooting training focused on fault analysis, problem resolution, assessment of critical machine components, remote service applications, process optimization and automation handling.

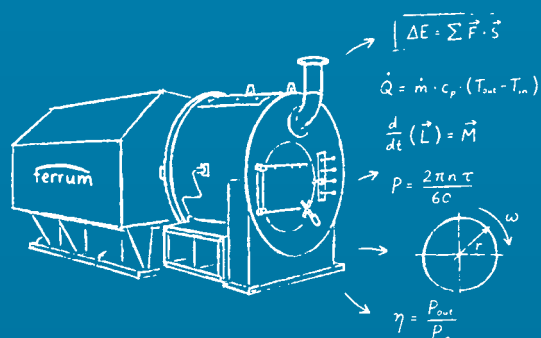

Participants learn a structured approach to diagnosing alarms, identifying root causes and restoring reliable operation.

DURATION

3 days

TARGET AUDIENCE

Production and Line Managers
Operators
Service Technicians

**KNOW MORE.
DOWNTIME LESS.**

TURN KNOWLEDGE INTO UPTIME.

LEARN. OPERATE. OPTIMIZE.

Welcome to the Ferrum Competence Center. Your centrifuge is a critical asset in your production process. Maximizing performance, ensuring safety and reducing downtime depend on the expertise of your people. Our hands-on training programs combine practical experience, technical know-how and real-world application. Participants train directly on Ferrum centrifuges and gain the skills to operate, maintain and optimize their equipment with confidence. Choose the package that best fits your goals and empower your team to achieve reliable performance every day.

DAILY TRAINING FEE PER PARTICIPANT

Training fee per person and day: CHF 350.–
2 days: CHF 700.–
3 days: CHF 1050.–
5 days: CHF 1750.–

Training fees include course participation, training materials, lunch, refreshments and local transportation (Ferrum/hotel).

Daily rates exclude accommodation, additional meals, travel expenses and interpreter services.

Training dates are arranged individually.

LOCATION & TRAINING ENVIRONMENT

The Ferrum Competence Center is located in Schafisheim, Switzerland.

The training sessions take place on the centrifuges most commonly configured by customers in a dedicated learning environment, allowing participants to gain practical experience without impacting ongoing production.

Sessions include technical instruction, process know-how, application expertise and insights into the latest Ferrum developments and innovations.

PROGRAM

Day 1
9:00 AM — 12:00 PM | Morning Session
12:00 PM — 1:30 PM | Lunch Break
1:30 PM — 4:30 PM | Afternoon Session

Following days
8:00 AM — 12:00 PM | Morning Session
12:00 PM — 1:30 PM | Lunch Break
1:30 PM — 4:30 PM | Afternoon Session

LANGUAGES

- + German
- + English
- + Additional languages and interpreters available on request

All training materials, including the detailed agenda, training presentation and operating instructions, are provided in the selected training language.

Participants also receive electronic documentation, including centrifuge operating manuals and spare parts catalogues.
