

**CANNING TECHNOLOGY**  
**AUTOMATIC QUICK-SET CAM**  
**FERRUBASIC CAN SEAMER OPTION**

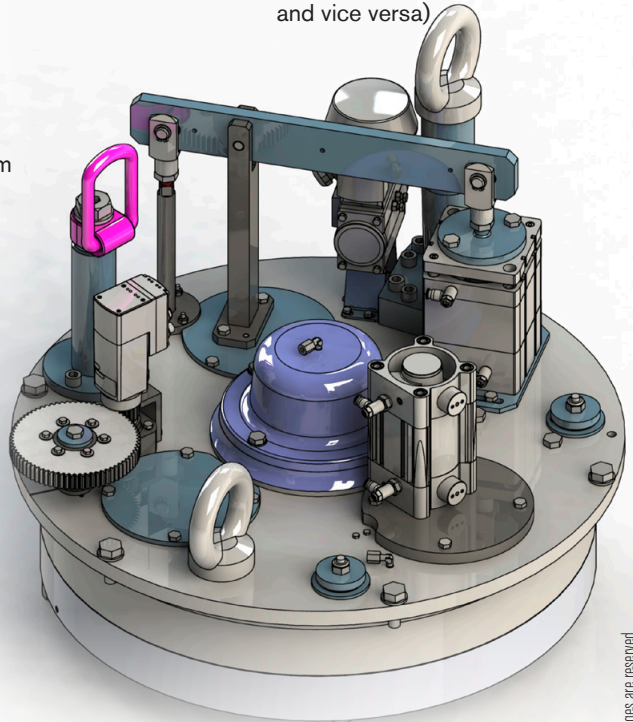

## Benefits for the customer

- + Time saving components more efficient than manually controlled elements
- + Changeover from aluminum cans to steel cans and vice versa accomplished in max. one minute
- + Convenient operation via ferruFlow-touch panel
- + Physically mounting on the machine is only necessary in the event of servicing
- + ferruFlow-touch panel operation provides a safer working environment
- + 10 times more positions of the cam than on older quick-set cam
- + Multiple memory positions are available for different material thicknesses

## Following functions are electrically driven and can be controlled from the touch panel

- + Knock-out cam (for replacing knock-out pads)
- + Clamping/loosening of the seaming cam of the 2nd OP
- + 2nd OP can be disengaged to check the seam quality
- + Quick set cam (during switch from aluminum cans to steel cans and vice versa)

Technical changes are reserved.
